Item No. 9 : Special Business – Special Resolution

Presently, the Company's securities are listed at the following three Stock Exchanges in India:-

- i. The Stock Exchange, Mumbai
- ii. The Calcutta Stock Exchange Association Limited.
- iii. The Gauhati Stock Exchange Ltd.

With the extensive networking of The Stock Exchange, Mumbai (BSE) and the extension of BSE terminals to other cities as well, investors have access to online dealings in the Company's securities across the country. The bulk of the trading in the Company's equity shares in any case takes place on the BSE and the depth and liquidity of trading in the Company's securities on all other Stock Exchanges are negligible.

Trading in Equity Shares of the Company is permitted only in Dematerialised form w.e.f., 24th July, 2000 as per notification issued by the Securities and Exchange Board of India (SEBI).

It is also observed that the listing fee paid to the other Stock Exchanges is disproportionately higher and as stated herein, the trading volumes and liquidity are negligible compared to BSE.

As a part of cost reduction measures, the Company has proposed this resolution, which will enable it to delist its equity shares from all or any of the following Stock Exchanges:

- i) The Calcutta Stock Exchange Association Ltd.
- ii) The Gauhati Stock Exchange Ltd.

at an appropriate time in the future.

In line with the SEBI (Delisting of Securities) Guidelines, 2003 members' approval is being sought by a Special Resolution for enabling voluntary delisting of its Securities from the said other Stock Exchanges.

The proposed delisting of the Company's Securities from The Calcutta Stock Exchange Association Limited and The Gauhati Stock Exchange Ltd. as and when takes place will not adversely affect the investors. The Company's securities will continue to be listed on BSE. The delisting will take effect after all approvals, permissions and sanctions are received. The exact date on which delisting will take effect will be suitably notified at that time.

Your Directors recommend the Special Resolution for approval of members.

None of the Directors of the Company are, in any way, concerned or interested in the resolution.

Tea Division**Performance**

Production during the period under review was 143.89 lakhs kgs as against 143.45 lakhs kgs of the last financial year (09 months). The market started on a buoyant note and carried on till the month of September, 2004 due to fear of shortfall in the industrial production. As the projected shortfall, post September, 2004, was far less, the market started going down. Although, sales up to the month of September, 2004 showed a greater increase over the corresponding period of the year before, the end year scenario was similar for the Company and the industry.

The quality of teas produced by the Company has been much appreciated by the industry and the Company still enjoys the unique position as manufacturer of quality teas.

In view of the present state of affairs and in order to conserve resources, your Directors have not recommended payment of any dividend.

Exports

The Company continues to lay emphasis on quality production. However, due to cheaper teas available from existing exporters as well as new entrants in the market, the Company's volume of export declined marginally over

the corresponding period of the year before. However, there was appreciation in the price. The thrust will be on export of high quality teas to the existing market and to enter new markets which are yet to see the quality produce.

Future Strategy

The thrust on exports will be much greater than that of the previous years. However, the domestic market will not be excluded from quality produce. The year 2005 has opened on an encouraging note with countries like Iran sending their enquiries. The Company also proposes to increase its share in the Russian market whilst at the same time exploring business from the Australian sub-continent. Traditional importers like Germany and U.K. will be wooed with greater force in the year 2005, but forays made into the Australian market will be increased in terms of volume of teas exported.

Prospects

In view of the various measures initiated by the Government of India, State Government and Tea Board with active participation of Banks and Financial Institutions, the Company is hopeful that the Tea Industry, which is passing through one of its worst phase, will come out of the present state of affairs. The Company continues with its efforts towards maintaining cost control and aggressive marketing both in the domestic and international markets.

MANAGEMENT DISCUSSION & ANALYSIS REPORT:

Industry Structure and Developments

Tea :

Assam Company Limited is the first tea Company in the world, engaged in production and manufacture of tea from as early as 1845 and has established its position as one of the best quality producer in the Industry.

The Tea Industry in India has been passing through a difficult period. The market started on a buoyant note and carried on till the month of September, 2004 due to fear of shortfall in the industrial production. As the projected shortfall, post September 2004 was far less, the market started going down. Although, sales up to the month of September, 2004 showed a greater increase over the corresponding period of the year before, the end year scenario was similar for the Company and the industry.

In view of various measures initiated by the Government of India, State Government and Tea Board with active participation of Banks and Financial Institutions, the Tea Industry has started to show signs of improvement.

Oil & Natural Gas :

The petroleum industry in India is one of the oldest in the world and Assam Company Limited fortunately has deep roots in the past in this business. The exploration, production and refining were initially confined to the North-Eastern part of India, where the Company's Tea, Oil and Gas activities are well entrenched.

With the liberalization and reforms brought in the Oil & Natural Gas exploration and development business by the Government of India, great opportunities have been thrown open in this field. Your Company with its in built capabilities of having been in this business in the past would be able to play a vital role in this Sector specifically in the North-East part of India where it enjoys a goodwill and patronage particularly of State Government in view of its significant presence in this part of India for the last 150 years.

Opportunities, Threats, Risk and Concerns

Tea :

The Company is fully committed to produce high quality product and the tea produced by the Company has always been highly acclaimed for its quality in the Industry both in the domestic and overseas markets.

The Research and Development Unit of the Company is dedicated to Scientific Research & Development programme functioning in Assam. The Company continues with large scale cultivation of organic tea and production of high grade orthodox tea. White tea produced by the Company is highly sought after by overseas clients.

Emergence of more producers from new countries in the international market and cheaper import of tea are also adversely

affecting the competitiveness of the Indian Tea Industry. However, with the steps initiated by Commerce Ministry, Tea Board and the Industry by implementation of the various recommendations made by the experts study group is expected to improve the prospects of tea business.

The climatic conditions in the year under review as in the last few years have not been conducive to tea production. Many Estates of the Company were under water logging due to flash floods which resulted in huge loss of tea plantation and other valuable assets. Erosion of tea area continues unabated at six estates situated along the rivers Brahmaputra, Dangri and Dibru. The Company has also undertaken a river protection works and pump drainage at high cost as obligation to the Society.

Oil & Natural Gas :

The exploration business for developing and producing Oil and Natural Gas which involves highly competitive operations and risk exposures some of which are beyond the control of the Company, can be categorized but not limited to such areas as operational, political, regulatory, environmental and financial. The Company's operations for Oil business and related assistance are located in the North Eastern part of India that are suitable to insurgent activities which can hamper Company's operations but the Company's Management has considerable expertise in handling such activities in this area as it has been operating in this area for over 150 years.

Exploration and Production activities have a threat associated to Exploration risks, developing an unexploited domestic reserves and establishing an incremental recovery from producing assets and pilferage from the producing blocks. As there are good opportunities for joint venture with Indian & International Companies in this field, your Company has entered into joint participation with Canoro Resources Limited (Canoro) which will help in achieving productivity, profitability and recovery from producing assets. This will also bring in global expertise and experience in tapping the vast untapped resources in the North-Eastern part of India, which would be beneficial to the region's development.

The Exploration & Production activities are high capital intensive in nature. Such business also has certain inherent risks. However, the Company is trying to insulate against this risk by joint efforts and expertise of the Company's technical team and its international partner, M/s Canoro Resources Limited.

Segment-wise or Product-wise Performance

The Company, during the year under review, had operations in two geographical segments viz., Domestic market and Export market wherein 80% of the Company's turnover is contributed to, by Domestic market segment and the balance by Export market segment.

The Company has also entered into the field of Oil & Natural Gas and the work on extraction at the Discovered Field – Amguri in the State of Assam has already commenced in joint participation with Canoro and the results have been encouraging. Canoro is planning exploratory Well in AA-ON/7 field in which your Company enjoys 35% share. The work on the three Discovered Fields viz., Bihubar, Barsilla and Laxmijan for

which Service Contract had been awarded by Oil & Natural Gas Corporation Limited (ONGC) is expected to begin shortly. The Company hopes to play a vital role in the Oil & Natural Gas Exploration and Development in the North-East India in collaboration with Indian and International Companies.

Outlook**Tea:**

Tea Industry is highly dependent on the climatic condition which is beyond the control of the Company and its management.

The Year 2005 has begun on an optimistic note. But it is too premature to comment on the performance of the current year. The Company is hopeful that the support to the industry from both the State and Central Governments, the Banks and Financial Institutions will continue to be available so that the industry can come out of the present trying phase. We continue to be continuously optimistic about your Company's operations in near future.

In order to consolidate all tea business of the Company in one entity, your Directors have proposed to merge Namburnadi Tea Company Limited with the Company, subject to necessary approval/sanctions.

Oil & Natural Gas

The Oil and Gas business has been witnessing unprecedented boom in the international market with the oil price ruling at a high of above \$ 65 per barrel.

Considering the targets in hydrocarbon production in India, to feed the ever - increasing demand and consumption of petroleum products, the ever fluctuating international price of crude, there exist ample scope for growth in this field. The Company does not envisage any problem for sale of oil and natural gas in view of tie-up arrangements with Oil India Limited, Gas Authority of India Limited and Oil & Natural Gas Corporation Limited.

In order to commercially exploit the great potential in the Oil and Natural Gas industry to its optimum levels, your Directors have decided to demerge the Oil & Natural Gas Division of the Company into its subsidiary Assam Oil & Natural Gas Limited and the entire process in this respect is on.

Internal Control Systems and their Adequacy

The Company has appointed independent firms of Chartered Accountants, who conduct regular internal audit and keep

regular checks on the various internal control measures implemented. They also visit the various gardens and factories several times during the year and submit regular reports to that effect.

The Audit Committee of the Board of Directors examines the adequacy of internal control systems. The Company has Management Information System, which is an integral part of control mechanism.

The external auditors have evaluated the internal audit system in the company and have reported that the same commensurate with the size and nature of its business.

Financial & Operational performances

The Financial and Operational performance has been adequately dealt with in the Directors Report on Accounts.

Material developments in Human Resources/Industrial Front

As on 31st December, 2004 the company's Tea Division had 25440 employees, out of which 25347 were employed in the Plantation divisions.

Relationship with employees at all levels in the Tea Estates, Head Office and other locales generally remained cordial during the year under review. Your Directors wish to place on record their appreciation of the wholehearted support and co-operation received from the executives, staff and workers.

The Company endeavors to care for all its employees by providing welfare and medical facilities way beyond any statutory requirements.

Actual results may differ from such expectations, projections etc., whether expressed or implied. Several factors could make difference to the Company's operations. These include climatic conditions, economic conditions, auction and private sale regulations, Government regulations, tax laws, other statutes, natural calamity etc., over which the Company does not have any direct control.
